Subject: Microsoft Settlement

The proposed settlement does not come close to being fair to both consumers and competitors. Microsoft must not be allowed to force anyone at any time to utilize their software at the expense of a competitors. Nothing more need be said. To do reduces my job from that of an Information Systems Manager to a simple implementor of Microsoft products. Microsoft needs to be told how to be fair. Their historical behavior proves that they will not do it on their own. We beseech the courts to act fairly in this matter and to reject this harmful settlement.
